**Subject:** Public Hearing Comment: IFF Proposal

Dear California Department of Aging,

My name is [Your Name], and I am an older adult in Los Angeles County. I am writing because I am scared about what these proposed funding changes could mean for me and others like me.

The services I receive—meals, programs, and support—are not extras. They are what help me get through each day. They keep me healthy, connected, and from feeling alone. Without them, I truly don't know how I would manage.

For me personally, this program means:

**[Example: “I rely on home-delivered meals because I can no longer cook for myself.” or “The senior center is the only place I see other people each week.”]**

Please, I ask you to **pause and carefully review this funding formula**. Make sure it is fair and truly reflects the needs of communities like mine. Most importantly, please ensure that **no seniors lose services or are harmed by these changes**.

We have worked our whole lives and now depend on these programs to live with dignity. Please don't take that away.

Sincerely,

[Your Name]
