Dear Valued Legrand Customers,

Since its declaration as a public health emergency on January 30<sup>th</sup>, the COVID-19 (Coronavirus) Pandemic has had, and continues to have, an unprecedented impact around the world. Legrand is committed to doing our part to protect the health and well-being of our employees, customers and their families, while also striving to maintain the quality service you expect from us.

### **What is happening at Legrand?**

We have put in place several measures at each of our facilities, all meeting or exceeding the highest standards recommended by the CDC and government authorities, to ensure the welfare of our customers and employees.

At this time, all employees who are able have been instructed to work from home and collaborate virtually until further notice. Enhanced cleaning protocols and distancing requirements have been implemented in all Legrand facilities for the protection of employees remaining on site. These measures are intended to help reduce the spread of this outbreak, allowing for a swifter recovery and, most importantly, saving lives.

To date, the government recognizes Legrand as an "Essential Service" and we have put plans in place that will allow for minimized disruption in service to our valued customers. We recognize the critical nature of the businesses we support. Legrand factories are operating, and our office staff is working remotely.

### **What does this mean for your projects?**

To help us best serve our customers and communities, we are focusing on released projects and any product supply demands related to essential services.

### **What can your team do to help?**

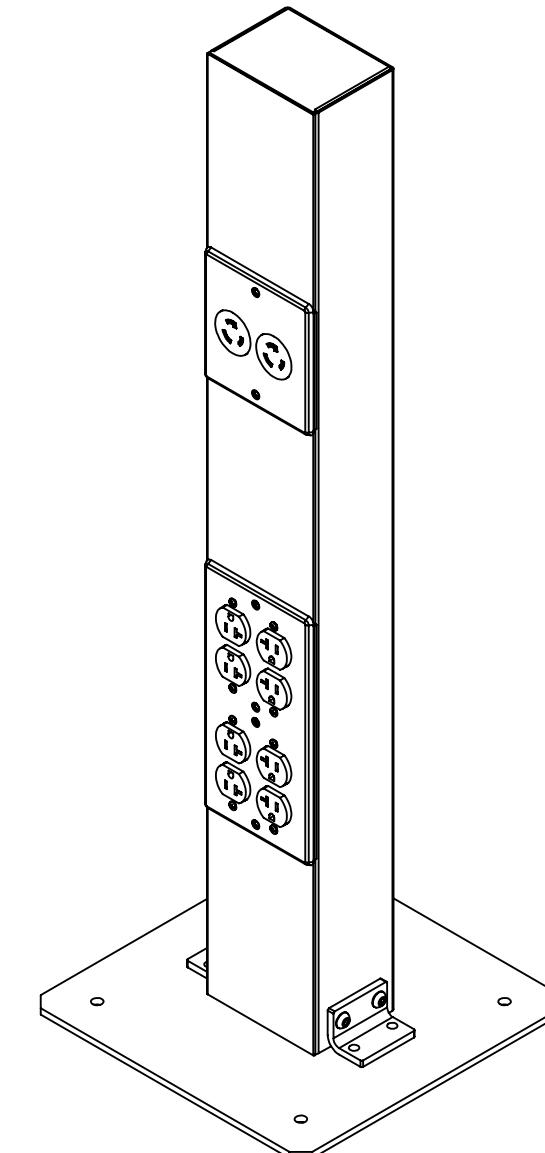

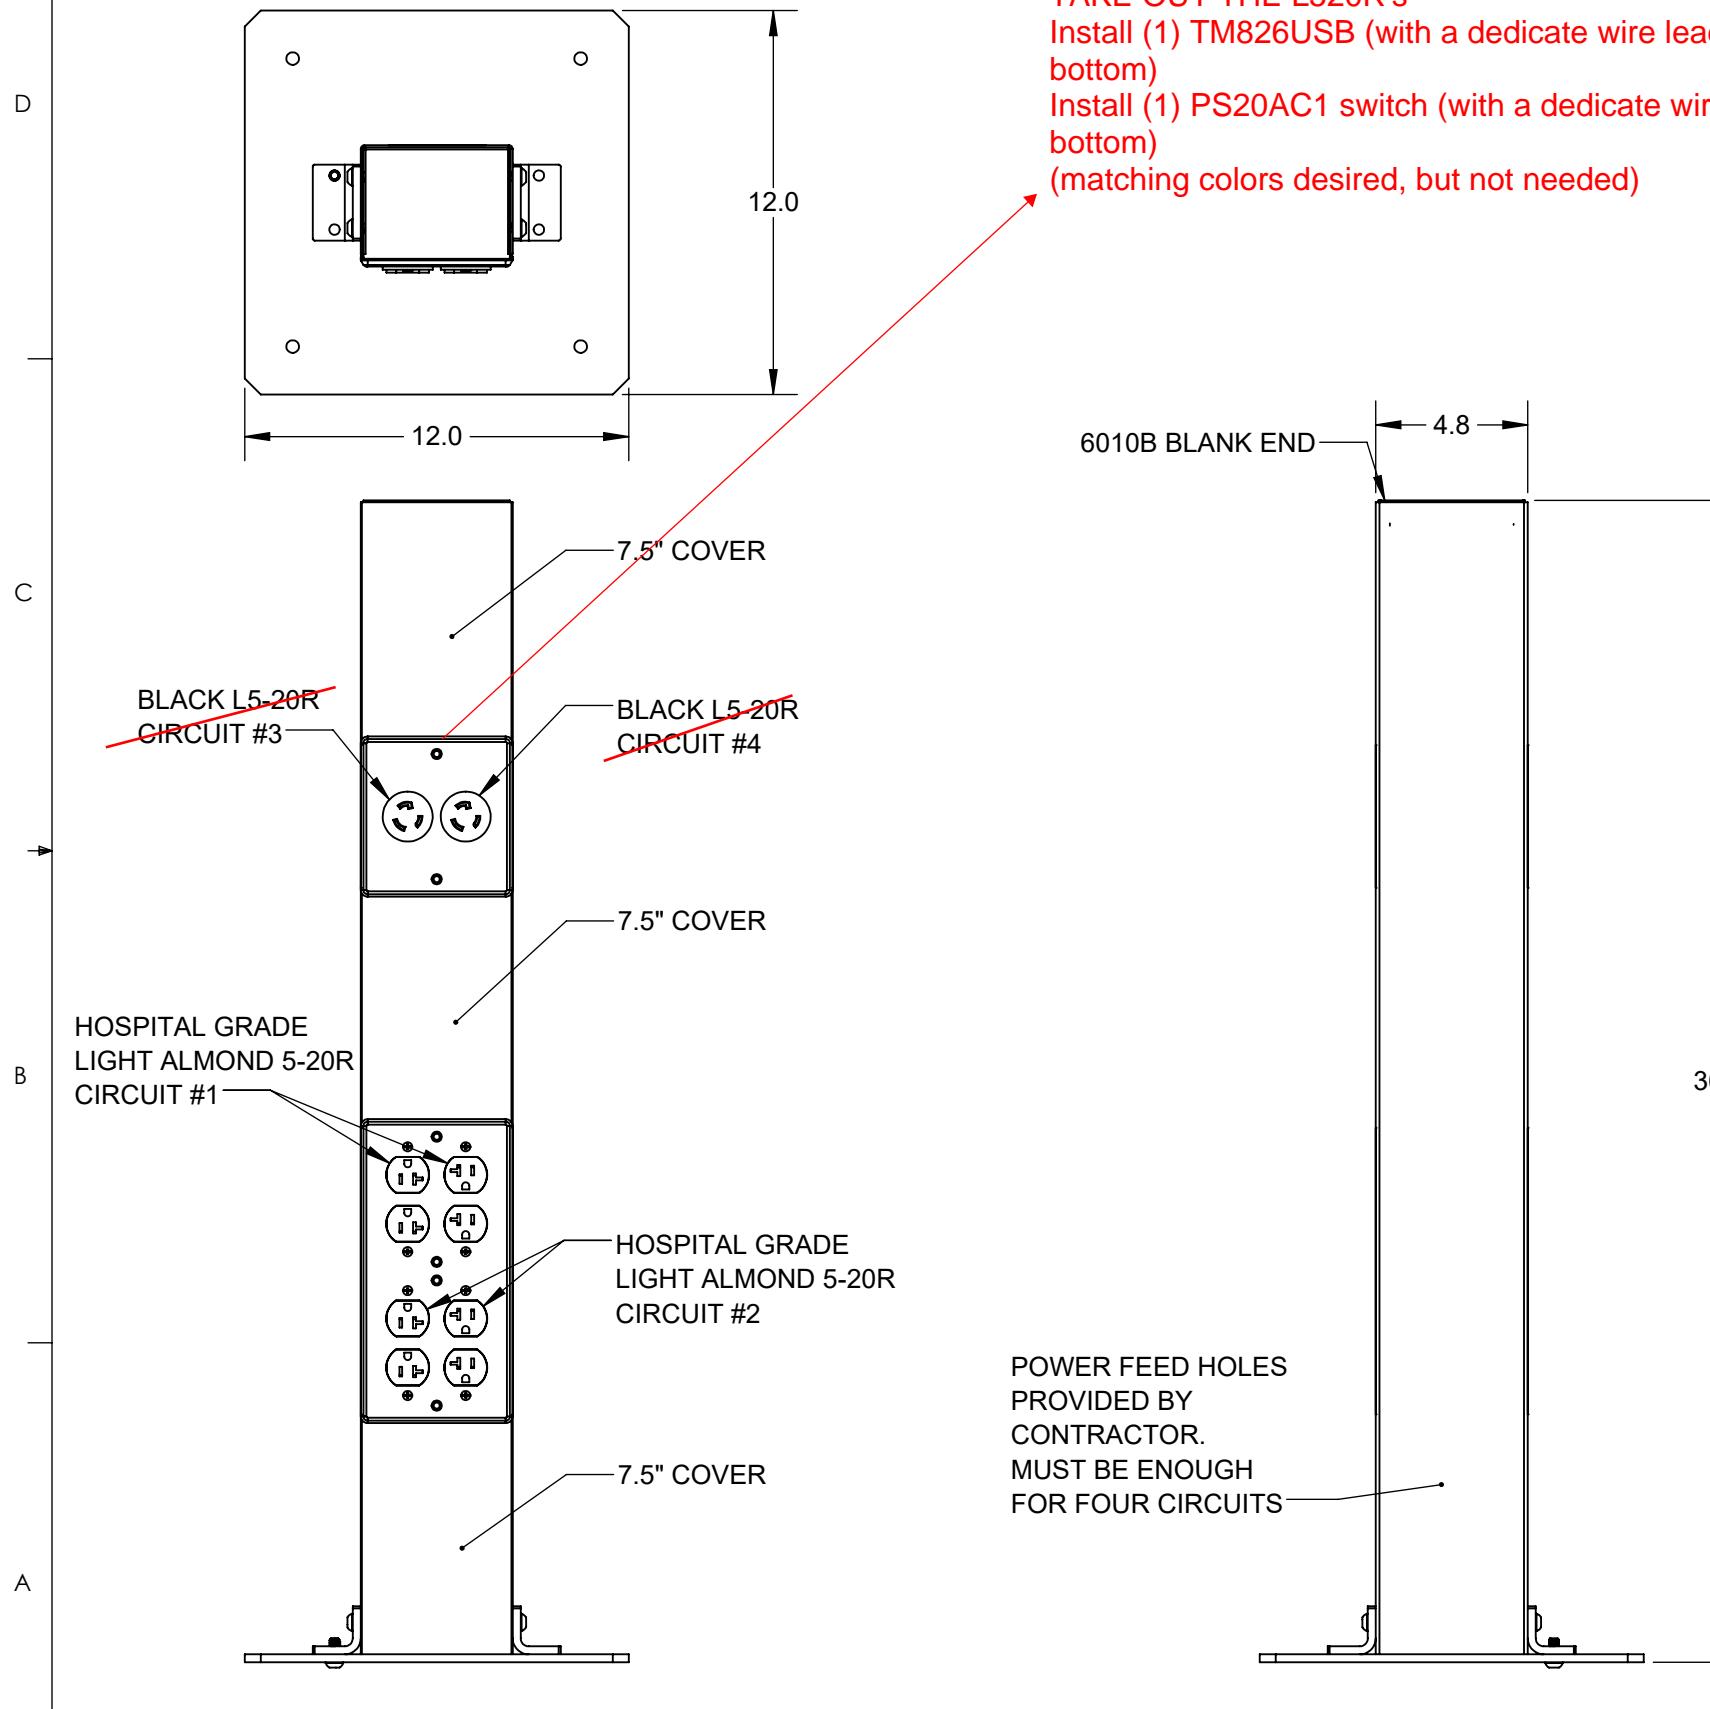

Please contact your local sales representative and let us know of all product demands and projects related to essential services so we can plan accordingly to meet these critical needs, while identifying what items can ship later with no negative impact.

Legrand is ready to help you as local jobsites unexpectedly open or close. Please advise Legrand of any issues you are seeing related to office or job site closures or suspended work. Legrand understands this is a very fluid situation. We are here to work closely with your organization and support you to the best of our ability throughout this uncertain time.

We will continue to closely monitor the situation and react quickly. As always, if you have any questions, please call your local representative.

Your continued engagement can and will make a difference. Thank you for being part of the Legrand community. We hope you and your loved ones stay safe and healthy.

# SPECIFICATION

# THE POWER TO PERSEVERE

Legrand Temporary and Permanent Power  
Solutions for Crisis Healthcare

## THE POWER TO KEEP YOU ON YOUR FEET.

In ever-changing situations, you need power solutions as nimble as you are. Luckily, when times get tough—we get even tougher. Legrand has a fully stocked line of temporary and permanent power solutions to solve your biggest healthcare challenges.

### Perfect for:

- Building new wings and units to fulfill capacity requirements mandated by local governments
- Updating healthcare facilities to handle higher patient numbers and power up increasing quantities of vital equipment
- Temporary healthcare setups in buildings not originally designed for healthcare, like gyms, convention centers and more

## THE POWER THAT'S AS DEPENDABLE AS YOU.

No one can be slowed down by old or unreliable power supplies. Every piece of equipment has to be up and running, all of the time, without interruption. With over 125 years of experience in manufacturing electrical devices, you can rest assured that we've thought of everything. Installation is quick and efficient. Devices are code compliant, safe and rigorously tested. For end users, it's intuitive to plug in and get the connections they need to keep people safe. Whether you need to step in and replace old devices, or step up and help increase capacity, our options are in stock and ready to go.

### • Hospital Grade PlugTail® Receptacles and Switches for lobbies, patient rooms and critical care units

- Installs 5x faster than conventional devices
- Get in and out of the project quickly
- Easily make upgrades or changes later
- Meet rigid test requirements for abrupt removal, ground contact overstress, impact resistance and assembly integrity

### • Watertight and Antimicrobial Plugs and Connectors for anywhere you need power that's safe from moisture

- The toughest devices for heavy duty applications
- Keeps connections safe
- Tested to undergo varying levels of splashing and submersion

### • Power Poles for hospital beds, nursing stations and more

- Quick installation
- Simple to use
- Designed to blend in and stay out of the way
- Combination of lighting and power

### • Plugmold® Multioutlet Systems to bring necessary connections to tight locations

- Compact, low-profile design
- Easy installation

### • Wiremold® Prewired Raceway

- Installs in 1/3 of the time and is ready for termination at the job site
- Wired and preassembled for fast, painless installation
- Quickly and easily delivers power to labs and other critical healthcare support stations

# THE POWER TO PERSEVERE

Legrand Temporary and Permanent Power  
Solutions for Crisis Healthcare

 **legrand**®

## THE POWER TO HELP TRANSFORM.

When put to the test, we know you outperform by making what you need at the job. You need temporary power that's just as inspired as you are. Don't wrangle with makeshift power setups and risk losing precious connections. Stock up on our portable options when you need to quickly bring power to atypical applications. They're easy to maneuver and simple to set up. Even better, they're code compliant and designed specifically for construction sites, new power setups and temporary situations.

### • Hospital Grade Plug-In Outlet Centers for labs and other workstations

- Bring power safely and conveniently in a portable plug-in unit
- Low, space-saving profile that's aesthetically pleasing
- Includes lighted switch and resettable circuit breaker

### • Portable GFCI Receptacles for on-the-go safety

- Adapt any receptacle to provide GFCI protection
- Auto-reset and water-resistant
- Watertight rubber cord grommets seal the GFCI from the environment

### • Cam-Type Devices for continuous, worry-free power

- Enhanced durability and service life with increased insulation protection for safety
- Designed and engineered for interchangeability with other manufacturers' cam-type products
- UL Listed, CSA Certified and rated NEMA 3R and 4 for use in outdoor applications

### • Turnlok® Locking Plugs and Connectors for when power can't be pulled

- NEMA configurations are always visible for fast ID without disconnecting
- Extra-rugged construction features chemical and impact-resistant nylon housings
- Industrial-strength, brass alloy plug blades and connector contacts and optional neoprene dust covers and weatherproof boots

### • Cable Protectors for organization and reduced tripping hazards

- Multiple channels to safely manage onsite cables
- Convenient stake-down holes and handle for carrying
- Rugged, all-weather polyurethane construction stands up to heavy traffic
- Meets NEC and OSHA requirements
