

# HOW TO WASH YOUR MASK

You should clean your cloth face mask after each use. It's a good idea to have several masks on hand that can be rotated, so a clean one is always readily available. Here are some cleaning options:

**MACHINE WASH:**  
Wash in hot water (160°F) using soap or detergent, then rinse and dry on the highest heat cycle.

**HAND WASH:**  
Hand wash with soap and water, let it soak for 30 minutes, then rinse and dry with a hair dryer.

**PAPER BAG:**  
Store in a paper bag for two to three days at room temperature.
