

COVID-19 MASK MATERIAL

Have you tried to make your own mask? Here's what you need to know to choose the best material for making a mask.

Effectiveness of Household Materials at Capturing Virus-sized (0.02 Micron) Particles

Data Source: 2013 Society for Disaster Medicine and Public Health, Inc.

This study was performed at Cambridge University during the 2009 H1N1 flu pandemic. The scientists tested 0.02 micron Bacteriophage MS2 particles, which are five (5) times smaller than the Coronavirus.
