

# COVID-19 HAND SANITIZERS

Using an alcohol-based hand sanitizer with at least 60% alcohol when soap & warm water aren't available can help you avoid getting sick and spreading germs to others.

Apply a dime size amount to your palm

Rub hands together, covering all surfaces of both hands

Make sure to include between your fingers

Continue rubbing hands until completely dry

*Remember, always keep alcohol-based sanitizers out of the reach of children, they can cause alcohol poisoning if swallowed.*
