10% discount to all members**

We are a Swift Current-based business that has been making custom industrial chainmail pieces for over a decade. We specialize in retrofitting machines whose guard is damaged, restrictive, or just never there to begin with. If you have an unguarded machine or a guard that is limiting a machine's use, check out [Mailletec.com](http://Mailletec.com) or call us at (306) 774-4080.

Being safe shouldn't be an inconvenience! Our guards are some of the most user friendly on the market. They allow access to the full work area, while moving fully out of the way for maintenance. Odd shaped or oversized parts are no problem – just drape the mesh over it – or order your guard with an overlapping access slit to speed up repetitive work.
