Participants Needed for Ergonomic Research

Study Objective

We are conducting a research study to understand how workplace posture, movement, psychosocial factors, and task characteristics are captured using computer vision and wearable sensors, and how these factors may relate to musculoskeletal discomfort experienced during daily work tasks.

Eligibility Criteria

- Employees at UC Berkeley, UCSF, UC Davis, or a participating organization
- Ages 18–65
- Able to perform your normal daily work tasks
- No current musculoskeletal injuries

What will participants do?

- Participate in one ~1-hour session
- Perform your regular daily work tasks in your workplace
- Be recorded using a side-view video camera
- Complete questionnaires about:
  - psychosocial and organizational factors
  - task characteristics
  - physical discomfort

Compensation

- $25 Gift Card

Study Location

The research team will come to your workplace for the study session.
