

Electrical Division

Behind the Lights

Every day, thousands of residents walk into El Paso County facilities expecting the lights to turn on, alarms to stay active, and every system to run smoothly. What they don't see is the team making all of that happen. Robert Pintor and the Electrical Division Team are the behind-the-scenes heroes who keep power flowing across every County building.

Keeping the County powered requires constant monitoring, preventative maintenance, and a team ready to respond at any moment. If backup systems fail, core public services like planning, records, motor vehicles, customer support, and human services could grind to a halt. Thanks to this team, they don't.

Before joining El Paso County, Robert Pintor spent nearly 12 years as an Air Force firefighter, shaping his commitment to safety, preparedness, and staying calm under pressure. Today, he leads an Electrical Division with more than 200 years of combined experience between Greg Hamby, Wil Greene, Ross Flank, Chris Trujillo, Victor Villalobos, and Andre Vigil.

Their work extends far beyond installing and repairing electrical systems. The team oversees backup power systems, including uninterruptible power supplies (UPS) and generators, that serve as critical lifelines during outages. They're also supporting federally funded projects to upgrade County facilities with energy-efficient LED lighting.

"A lot of what we do happens behind the scenes," Pintor shared. "People just expect the lights to turn on, the alarms to work, and the building to function." And for this dedicated team, meeting those expectations, every time, is a point of pride.
