The Pine Ridge Reservation in South Dakota, which encompasses more than 2.8 million acres, is home to the Oglala Lakota, a tribe that is part of the Sioux people. Much like Native American reservations across the United States, the 38,000-person indigenous community is disconnected from the state's economic lifelines and untouched by development. Among the most impoverished of these reservations, Pine Ridge is plagued by an 80 to 90 percent unemployment rate with a median individual income of \$4,000 a year.
