Design Solutions For Business Productivity

What a compelling time in history we have all witnessed in these last couple of months. Right now we are on the cusp of reopening as a nation, in stages, with new federal, state and local guidelines that are new to us all. But together, we can create spaces that respect and protect our customers and employees as we adjust to our new normal. The recent pandemic has asked us all to reimagine our workspaces, to remain productive and in doing so we have had to flex our innovative design strategies to include social distancing while maintaining beauty and safety. One of the most exciting things that I am working on currently is the research and development of new innovative product solutions for spaces that are Covid19 compliant.

As a Brand Manager of Stone Gallery (Brooklyn, NY) I have been establishing brand representation in the US for 4 years and managing coordinative effort overseas with the sourcing of new innovative materials. We have been curating materials for our clients and are now proud to co-sponsor PetaloUSA.

Along with our European partners, together we are proud to offer Petalo Systems. These systems are your answer to productivity in a Covid19 world. Petalo Systems are lightweight, easy to assemble, and easy to clean and maintain. These are physical barriers designed to retro-fit into existing businesses and allow companies to begin working again. Industries that can begin utilizing these systems right away include OFFICE SPACES, SCHOOLS, HEALTHCARE PROVIDERS AND HOSPITALS, BEAUTY SALONS AND SPAS, RESTAURANTS, NIGHTCLUBS, THEATERS, and SPORTING ARENAS to name a few. These are versatile solutions, if you are wondering if Petalo Systems can work for you contact me directly for a free consultation. PETALO System's are made of Lisocore™ and MDF framing with a transparent Plexiglass middle. They are designed to reduce the spread of infectious disease while conserving a stylistic approach. They are better than any competitive product as they are manufactured in Italy with the highest quality material and attention to detail. We are here to help redesign your space to meet and exceed your expectations while maintaining all the new current guidelines.
