

Instrumentation for Operators Workshop

This training course introduces the basic principles and operation of the process instrumentation used to measure flow, pressure, and temperature; while also exploring the operation of various analyzer systems.

Cost: \$400

The fee includes all classroom materials, meals, and lab costs. The instructor of the course, Thomas Langland is a retiree of the Dow Chemical Company with 32 years of experience in various chemical manufacturing, supply chain, leadership, and large capital project positions. He received a BS degree in Chemical Engineering from the University of Oklahoma in 1983.
