

Building Hope. Restoring Sight. Changing Lives.

EYE DONATION
MONTH
NOVEMBER 2023

“After my accident, I would use 4 to 5 different special drops on my injured eye, 5 times a day. I could not sleep laying down, I could not comfortably drive, I could not even enjoy sitting outside in my backyard in the daytime. Just 3 days after my transplant, my sight and light sensitivity drastically improved. I went from seeing nothing, to being able to see lines, then shapes and colors. Having restored vision is truly a miracle. I wrote a 4 page letter to my donor's family, thanking them for this gift. I will forever love them and my donor. ”

Sam - Cornea Transplant Recipient.
