QSHIELD

QShield partners with Education Above All Foundation

A step forward in aligning business with real-world impact.

We're proud to announce that QShield has officially partnered with Education Above All Foundation (EAA).

This collaboration goes beyond traditional CSR. It reflects a strategic approach where business expertise and global education initiatives come together to create long-term, measurable impact.

Through this partnership, we are supporting key initiatives such as the Qatar Scholarship Programme and Qatar Connection, creating opportunities for students in Qatar through education, engagement, and real-world exposure.

At QShield, we believe impact should be embedded into business strategy, not treated as an afterthought. This partnership reinforces our role as a strategic enabler of global impact through structured corporate frameworks and cross-sector collaboration.

Aligned with Qatar National Vision 2030, this initiative contributes to advancing education, fostering human development, and strengthening public-private partnerships.

We look forward to building meaningful, scalable impact together.
