

Hybrid Thermal Network Bullet Camera

300 x 400 Thermal Sensor and a 2 MP CMOS Sensor

System Overview

The Hybrid Thermal Network camera combines an uncooled VOx 300 x 400 thermal imager with a 2 MP visible-light sensor for cost-effective, long-range surveillance in a rugged all-in-one package. The thermal imager coupled with an athermalized, focus-free lens produces crisp images in total darkness and sees through rain, fog, and snow. The visible imager with an IR illuminator delivers superior video in any lighting condition.

Functions

Uncooled Vanadium Oxide (VOx) Technology

Dahua thermal cameras use an uncooled Vanadium Oxide (VOx) sensor that delivers higher thermal sensitivity in a more compact and cost-effective package. Vanadium Oxide cameras are also more reliable, as compared to other thermal imaging technologies, due to less moving parts.

Athermalized Lens

The athermalized lens used in Dahua thermal cameras maintains the focus position passively and without power over a wide temperature range.

High Thermal Sensitivity

The VOx detector offers high thermal sensitivity (\leq 50 mK) that allows Dahua thermal cameras to distinguish objects in a scene with minimal temperature differences. The camera captures detailed images where thermal contrast between object and background is minimal.

Active Alarm

The camera is equipped with a white-light illuminator and an external speaker that can be triggered when the camera detects an abnormal event either via the thermal or the visible-light sensor. The camera also takes a snapshot of the scene and can record the snapshot.

Thermal Camera

- 300 x 400 VOx Uncooled Thermal Sensor Technology
- Athermalized Lens, Focus-free
- 13 mm Fixed Thermal Lens
- ≤ 40 mK Thermal Sensitivity

Visible-light Camera

- 1/2.8-in. 2 MP Progressive-scan CMOS Sensor
- 8 mm Fixed Lens
- Maximum IR Distance 35 m (114 ft)

System Features

- Active Alarm
- Support ROI, Motion Detection, and Color Palettes
- Enhanced Power and Data Transmission Distances (ePoE)
- IP67 Ingress Protection

Enhanced Power over Ethernet (ePoE) Technology

Dahua's innovative ePoE technology offers a plug-and-play solution to transmit power and data over long distances via Ethernet or coaxial cables, reducing installation time and saving money. ePoE technology is a viable, cost-effective solution for extending transmission distances and for converting existing, coax-based analog systems into IP systems. For video security and surveillance installers, ePoE technology saves time and money by reducing overall cabling requirements, allowing for existing coax cable to be used, and minimizing the number of peripheral devices needed. For new installations, ePoE offers the ability to design long-distance applications without the need for additional repeaters.

Thermal Color Palettes

Dahua thermal cameras provide a choice of color palettes onboard the camera that help to distinguish thermal variations and patterns in an image. The color tones correspond to the apparent surface temperatures of the target.

Interoperability

The camera conforms to the ONVIF (Open Network Video Interface Forum) specification, ensuring interoperability between network video products regardless of manufacturer.

Environmental

With a temperature range of 10° C to $+35^{\circ}$ C (50° F to $+95^{\circ}$ F), the camera is suitable for many internal applications. Subjected to rigorous dust and water immersion tests and certified to the IP67 Ingress Protection rating makes it suitable for applications were water and dust are present.

Protection

The camera allows for ±20% input voltage tolerance, suitable for the most unstable conditions for outdoor applications. Its 6 KV lightning rating provides effective protection for both the camera and its structure against lightning

Technical Specification				
DH-TPC-BF5421-T Therma	al Hybrid Camera			
Thermal Camera				
Image Sensor	Uncooled VOx Focal Plane Detector			
Effective Pixels	300 (H) x 400 (V)			
Pixel Size	17 μm			
Thermal Sensitivity (NETD)	≤40 mK			
Spectral Range	8 μm to 14 μm			
Image Settings	Electronic Thermal Image Stabilization Digital Detail Enhancement			
Color Palettes	18, including: Whitehot, Blackhot, Icefire, Fusion, Rainbow, Globow, Ironbow1, and Sepia			
Thermal Lens				
Lens Type	Fixed-focal			
Focus Control	Athermalized, Focus-free			
Aperture	F1.0			
Focal Length	13 mm			
Angle of View	Horizontal: 30.0° Vertical: 22.60°			
Visible-light Camera				
Image Sensor	1/2.8-in. CMOS			
Effective Pixels	1920 (H) x 1080 (V)			
Electronic Shutter Speed	1/1 s to 1/30,000 s			
Minimum Illumination	Color: 0.002 lux at F1.9 B/W: 0.0002 lux at F1.9 0 lux with IR On			
IR Distance	35.0 m (114.83 ft)			
IR On/Off Control	Auto, Manual			
IR LEDs	One (1)			
Visible-light Lens				
Focal Length	8 mm			
Maximum Aperture	F1.9			
Angle of View	Horizontal: 40° Vertical: 22°			
Temperature Measureme	nt			

Range	30° C to 45° C (86° F to 113° F)
Accuracy	±0.3° C, with blackbody ±1° C, without blackbody
Mode	Spot, Line, Area
Rule	Supports 12 Rules Simultaneously: • Spot: 12 • Line: 12 • Area: 12

Video			
Compression		H.265, H.264, H.264H, H.264B, MJPEG
