North Shore Marina

More than just your average marina.

Settled between the Grand River and Lake Michigan dunes, North Shore Marina has been providing boaters with service, slips and boating fun since 1950. It's also one of West Michigan's largest and most complete boat repair facilities.

Situated at the entrance to the Grand River in Spring Lake, Michigan, the 205-slip marina offers spectacular sunset views, along with the perfect location to set out on a Lake Michigan adventure, cruise into Spring Lake or visit Grand Haven.

"North Shore Marina is more than just simply a marina — it's a boating lifestyle," explains Charlie Bartosiewicz of North Shore Boat Sales. "Relax on your boat with friends while enjoying the picturesque views. Spend time with your family in the pool or hang out in our comfortable clubhouse. Let North Shore Marina become your home away from home."

The 71-year-old business has a long-standing reputation for great service and can handle nearly

any repair you throw its way, thanks to its certified and experienced staff. The marina also offers an over 100,000-square-foot indoor heated storage facility and 3 acres of outdoor storage, along with a 75MT travel lift and multiple marine forklifts. One of the best perks of storage at the marina is its in/out service that cuts down on hauling time. When you arrive, they'll pull your boat out and have it ready for you within minutes. When you're finished with a day of boating, they'll haul it back out and store it safely.

If you're in the market for a new boat or looking to sell yours, North Shore Boat Sales makes the experience as smooth as possible. It offers a variety of new and used boats with a team available to answer any questions, so even if you're a boating novice, you'll feel confident in your purchase.

"If you want a great spot to relax with your family in natural surroundings, come see us!" Bartosiewicz says. ★
