Yucca and Ocotillo Districts

Wyverd Fiber sequencing
(subject to change do to permitting or construction obstacles)

These parcels will be the first to see construction with in the next 30-45 days. We will add more neighborhoods to this view at the beginning of each month as we get closer to their completion.

1. Meadows at Independence
2. Porrta Estates
3. Maryland Heights
4. Desert Glen Estates
5. Glen Park AMD
6. Parkside
7. Orangewood Estates
8. Glen Eden
9. Paradise Views

wyYerd
new net now

Wyyerd Group was founded in 2017 with headquarters in Colorado, and since then has been expanding both organically and inorganically (via M&A). We believe that each community is unique and should have an equally unique and supportive internet access network, led by a local general manager and local team enjoying support and guidance from a deeply experienced central team.

Wyyerd Group acquired Zona Communications in 2019, an ISP that has served the West Valley of Arizona since 1995. From its inception through to today, the company has consistently maintained its reputation as one of the best internet providers in Arizona. Wyyerd has continued to expand its operations in Central Arizona, continuously upgrading our existing networks and bringing fiber-fast internet to new communities every day.

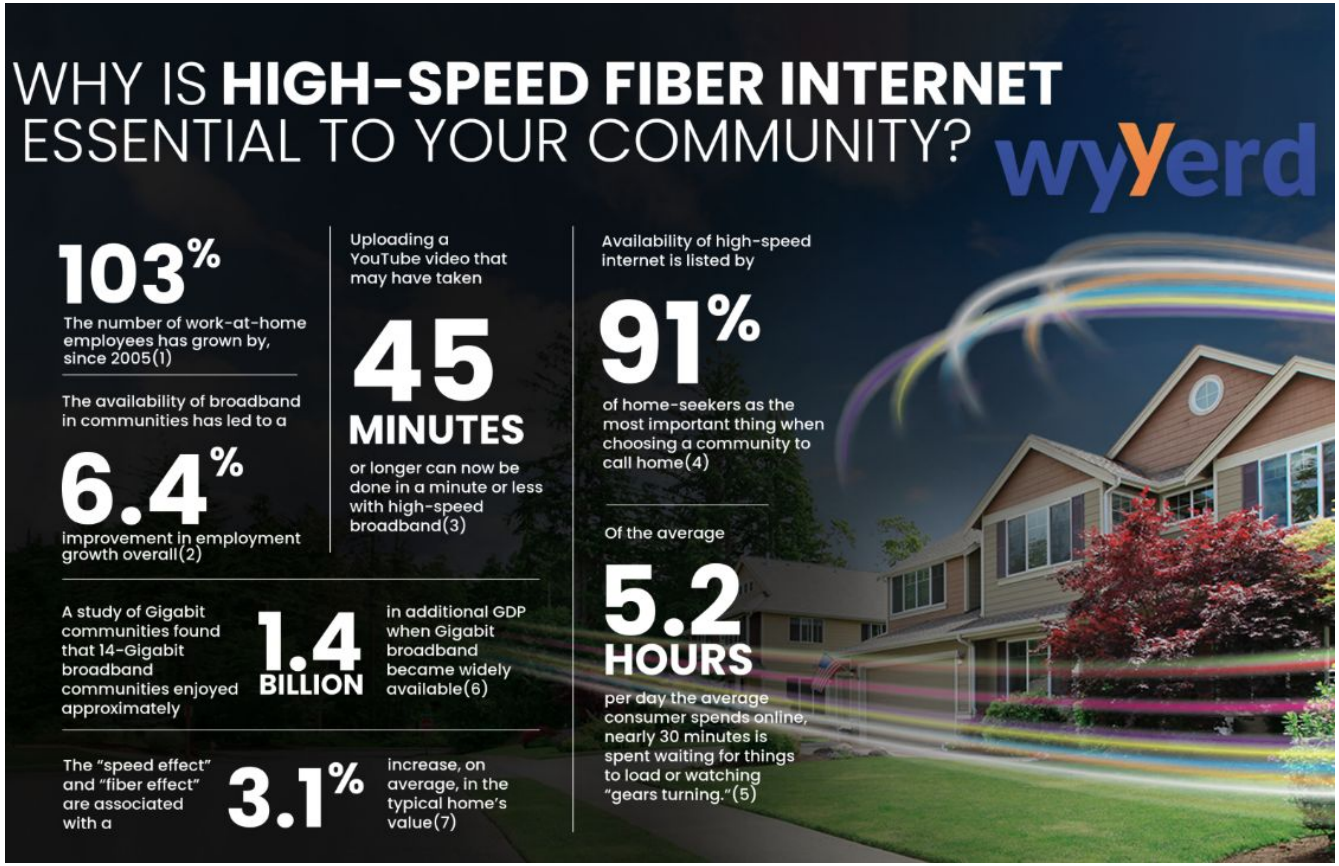

Wyyerd recently launched operations in Southern California, where we are eager to bring our fiber network to residents, businesses, nonprofits and government agencies alike.

wyYerd FIBER

Founded in 1995, Wyyerd is a progressive company offering state-of-the-art high-speed internet, telephone, and digital television services to residents and businesses within an 1100 square mile are of northern Phoenix. Our service area includes 700 square miles surrounding Lake Pleasant and Castle Hot Springs as well as a 400 square mile area of the northwest of the White Tank Mountains along the Sun Valley Parkway corridor.

From prominent developments in northern Peoria and Buckeye such as Vistancia, Sun City Festival and Festival Foothills to the remote enclave of Horsethief basin in the heart of Prescott National Forest, Wyyerd endeavors to provide exceptional communication services.

Wyyerd is a local company with local offices providing real time in community support for customers and residents.

Communications During Construction

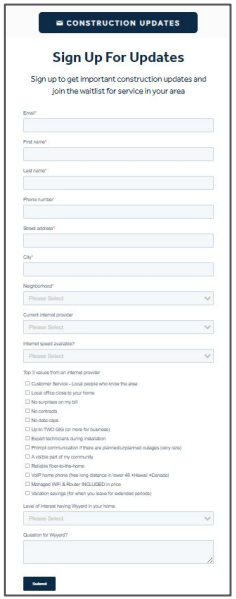

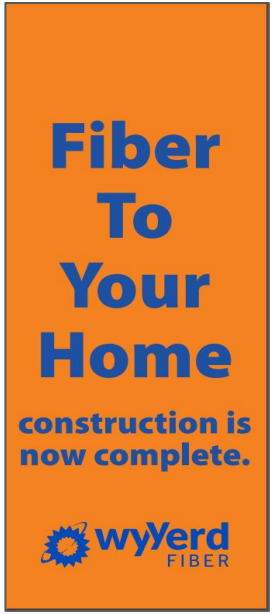

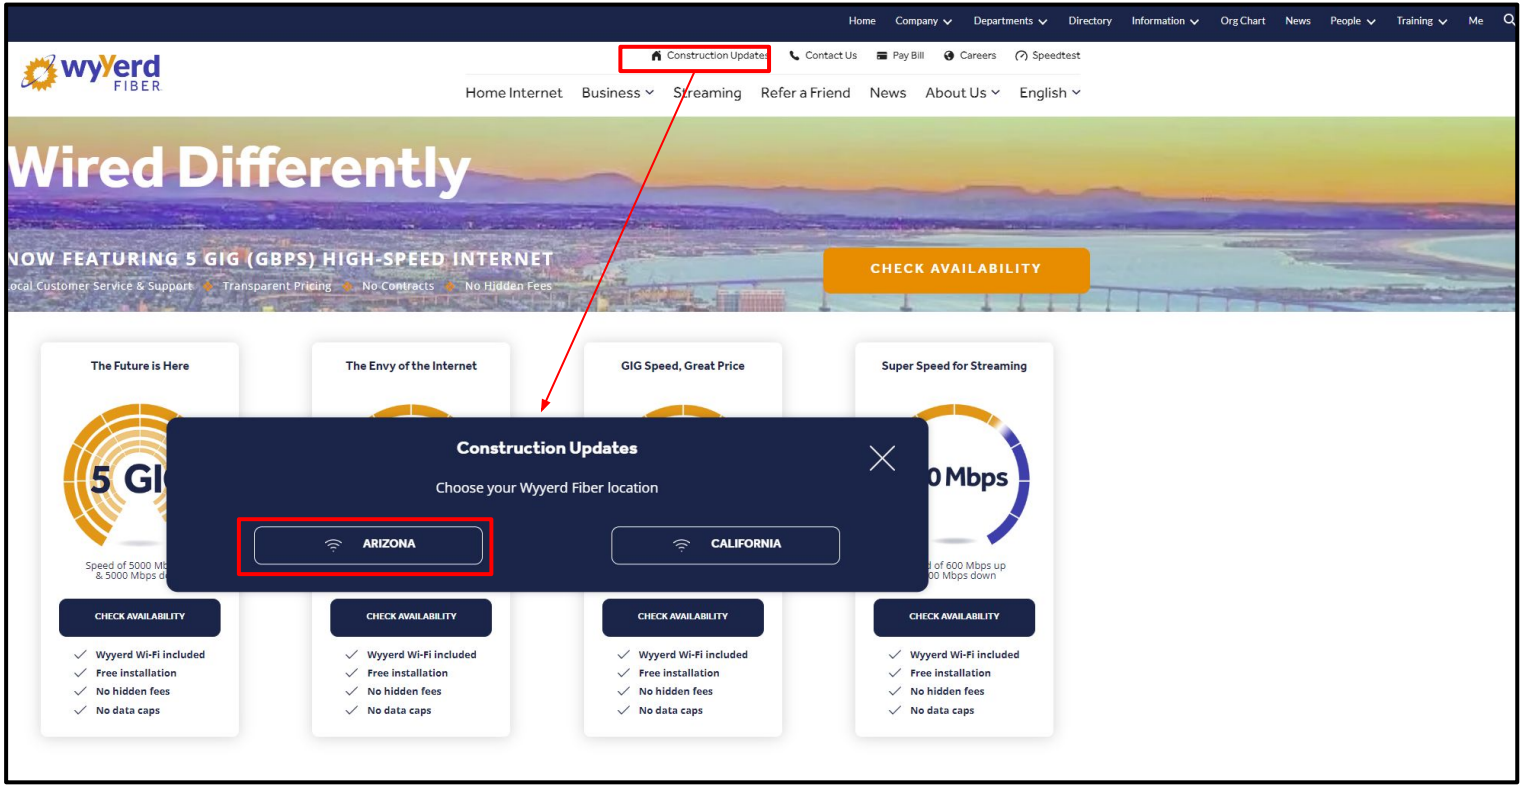

Build Strategy - Website

Build Strategy - Construction Website- Steps on the process, FAQ's & Videos on the process

5 STEP PROCESS:

1. Hang door hangers, send construction notices to every resident, ask residents to sign up f… email communications at fiber.events. The construction crews will mark the approved run… lines with white paint and the Wyyerd team will take photos of approved construction path…
2. The various utility companies with facilities in the area of our painted white lines will mark… existing path with the appropriate color paint or flags. Red for electric, orange for communications, blue for water, etc… Upon the completion of the utility locates, a pre-construction meeting will be held with the municipal Inspector and a start date will be set.
3. Perform construction work, via directional drilling and limited digging, including running o… fiber-to-the-home Internet to each home. Contractors will also complete decorative restor… work along the construction path and take photos of the restoration. Customers will then… able to order Internet and phone services.
4. Perform the hard surface (concrete and asphalt) restoration along the construction path.
5. Perform a walk through with the municipal Inspector to verify that all restoration is compl… the satisfaction of the municipality.
