

A Healthier Dry

You asked, we answered

AFTER WALK

Canines can get sweaty after a walk. Drying your pet with a traditional towel, pushes the moisture back into their coat, taking longer to dry and fosters the “wet dog” smell. Our gloves wick moisture away, allowing the dog to dry quicker and reduce allergens.

OEKO-TEX Certified— Why It Matters:

We’ve gone beyond organic certification, for textile and fabric that test for use of petro-based fertilizers, and pesticides.

With **Oeko-Tex** certification, our fabric has been tested and certified to be free from harmful levels of more than 100 substances.

- Certification is conducted by independent third party laboratories and is a **Global Standard**
- Testing takes into account every conceivable way that harmful substances can enter the body
- Oeko-Tex textiles and fabrics are certified **free of harmful chemicals & safe for use**

After Walk & After Bath Gloves

AFTER BATH

Make bath time a breeze. Our After Bath gloves Extract water from your dog's fur easier than a towel, and our gloves won't create tangles.

- One Size Fits Most
- Machine Washable
- Lightweight & Durable
- Moisture Absorbent
- Soft-Touch Poly-Blend
- Made in the USA

**DRY
FASTER**
