

THE ULTIMATE GUIDE TO GROOMING YOUR PET AT HOME

BRUSHING

Before bathing your pet, gently brush and detangle their hair with an appropriate grooming tool that's intended for their coat. Contact your local veterinarian or groomer to get information on the best types of brushes or combs to use.

BATH TIME

Place a towel or bath mat in your bathtub or sink underneath your pet's feet. Wet coat thoroughly with warm water. Clean with one of our moisturizing natural shampoos and conditioners and then rinse. To dry, press a clean towel on their wet coat to soak up water. Have no time for a traditional bath? Use our Waterless Foaming Organic Shampoo or Between Bath Freshener. When bath time is done, reward your good boy or good girl with a treat!

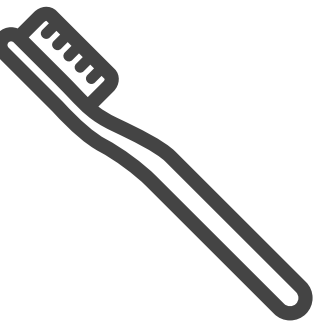

PAW PROTECTION & CLEANING

Protect those paws all year long. A moisturizing balm is the best solution to soothe paw pads that are cracked or calloused. Before and after walking your dog, gently rub our Certified Organic Paw Rescue balm into paws. Regularly examine paws for thorns or burs too. Remember to clean dirty paws before entering your home with our natural Cleansing and Grooming Wipes to help prevent the spread of germs.

NOSE & EARS

To soften and heal your dog's rough or chapped nose, apply our USDA Certified Organic Nose Rescue and rub it in gently. To keep your pet's ears safe from infections or other ear issues, clean ears at least once a month. Regular cleaning with our USDA Certified Organic Ear Cleansing System is essential in keeping ears healthy. Don't attempt to resolve a suspected ear infection. Contact your veterinarian immediately.

TEETH & GUMS

Your dog will need to get used to you poking around in their mouth, so speak calmly and gently to help relax them. Apply a pea-sized amount of our Organic Canine Dental Gel to our ergonomic Moso Bamboo toothbrush. Gently brush their teeth & gums to remove plaque & tartar. If you're short on time, you can quickly use our Plaque & Tartar Fighting Breath Spray.

PREVENT FLEA & TICKS

Examine your dog daily for fleas and ticks. After proper removal soothe the bite site with our USDA Certified Organic Healing Balm. To prevent these critters from latching on to your dog, use our Natural Flea and Tick Canine Shampoo, Spray and Wipes. Combining these products will result in optimum protection.
