*You asked, we answered*

**Quick Wick Drying Spray** — Time is of the essence when you are grooming. Our Quick Wick Drying Spray cuts drying time in half. It saves you valuable time, allowing you to groom more dogs in a day and ultimately, increasing your revenue.

The spray pulls water away by interacting with the dog's fur and creating a sheeting action. It leaves 50% less moisture in the coat, significantly improving the dry time.

**The Better Choice** — Our sprays are specifically formulated to run cleanly and not clog machines. Save time without cutting corners or quality.

**Product Tip** — Spray Quick Wick generously on the wet coat.

**No Dyes  
or Perfume**

## Quick Wick Drying Spray

### INGREDIENTS MATTER

**Purified Water** — is filtered to remove any impurities, pollutants, chemicals or toxic contaminants. Untreated hard water can cause hair loss and lead to dryness and damage to the follicles.

**Lavender Oil** — soothes eczema and dry skin while balancing the moisture in skin. It boasts anti-inflammatory properties and heals skin from insect bites and bacteria.

**Dimethicone** — a type of silicone widely used in health and beauty products that leaves the fur feeling silky smooth.

**Laureth9** — a widely used emulsifier and surfactant that has anti-itch properties. Helps treat dry and irritated skin.

**Potassium Sorbate** — a preservative and product stabilizer that serves as a paraben alternative to prevent the growth of micro-organisms.
