

WHY AMERICAN MADE MATTERS

SUPPORT OUR COMMUNITY

Buying American supports local manufacturers and communities as money goes into the local economy instead of overseas. Every \$1.00 spent on US. Goods generated \$1.85 in economy activity.

ECO FRIENDLY

Buying American creates a lower carbon footprint than foreign competitors as manufacturers in the USA are held to higher regulations. It uses less fuel with fewer emissions released in the air when shipping domestically.

ETHICAL LABOR

USA federal and state labor laws ensure safe and fair work practices. Made in the USA ensures you are not contributing to sweatshops, child labor, slave labor and dangerous working conditions. Fair trade puts people in the supply chain first.

READ THE LABEL

USA Made means product was Made in the USA, assembled means components came from another country . An American flag sticker does not necessarily denote it's USA Made as it's not regulated by the govt.
