

## Canine Flea & Tick Products

# You asked, we answered

**Natural Flea & Tick** — Protect your pets **NATURALLY**.

**The Better Choice** — traditional flea & tick collars can emit harsh chemicals. You don't need toxic pesticides to effectively kill fleas & ticks. Our trio of all-natural products are the safer choice for your pet, family and the environment.

**Product Tip** — layering product provides added protection. Our Shampoo is your go-to preventative. The Spray allows you to safely spray your dog & their bedding for pesky fleas & ticks. The convenient and portable Wipes are flushable and allow you to target prone areas. The face and ears, under the collar, groin, around the tail and between the toes.

**Ingredients Matter** — read the labels.

Most flea & tick applications can be harmful because of their ingredients. Our Flea & Tick products are natural:

**Peppermint Oil** — repels flea's as it contains a high amount of menthol a scent that they can't tolerate.

**Cedar Oil** — allows you to rid your pet of fleas & ticks as it disrupts their pheromones without harming pollinators.

**Rosemary Oil** — natural flea & tick repellent that is also antimicrobial, anti-fungal and antiviral.

**Cinnamon Oil** — repels ticks and naturally contains Eugenol, a fast acting natural chemical compound that kills ticks on contact.

**Naturally Kill Ticks**
