

ANYTIME, ANYWHERE, ANY DEVICE ACCESS TO BUSINESS APPLICATIONS, DATA, COMMUNICATIONS, AND IT SERVICES.....

ON A PREDICTABLE, PAY-AS-YOU-GO MONTHLY BILLING!

IntraSystems' IntraCloud Exchange Virtual Workspace, Desktop-As-A-Service is a complete, business-ready solution delivered as a cloud service with predictable, pay-as-you-go monthly billing. Organizations are drawn to our IntraCloud Exchange because it provides a better approach to IT...One that is simple, flexible and affordable.

**Are you and your IT staff experiencing the following problems?**

- **Productivity Issues:** Employees can't be fully productive and access all of their business applications and data outside of the office.
- **Mobility Issues:** Want to go mobile and use tablets and smartphones for business applications - not just email and web browsing.
- **IT Costs:** Unpredictable IT expenses for hardware and software are difficult to forecast.
- **Steep Technical Learning Curves:** Cannot keep pace with new demands and expectations for mobile access, BYO, data sharing and remote access while maintaining the existing environment and ensuring compliance and security mandates are met.
- **Security & Compliance Burden:** Required to support ever-growing requirements to maintain security needs, industry regulatory and compliance requirements.

**Consider the Key Benefits:**

- **Secure access to the applications and data you need:** Use any device from any location to securely access business-ready desktops with the specialized applications and data that run your business. Data and applications are safe and secure in the hosted desktop.
- **Simplify IT management and complexity:** No more managing servers, hardware and software updates. Applications are delivered, managed and supported as a cloud service and self-service provisioning makes it easy to add or remove users.
- **Simple and predictable to budget:** Enterprise-class technologies on an accessible pay-as-you-go model. Shift capital expenditures into a predictable monthly expense.
- **Secure and Compliant by Design:** Give your organization secure access to the specialized apps and data needed to run the business. Business-class mobile apps for secure email, browser and document sharing.

## COMMONLY ASKED QUESTIONS:

QUESTION	RESPONSE
<b>Will I need to buy new desktops and software?</b>	DaaS solutions deliver a high-definition experience to any device - even your aging devices that are due for an upgrade. There are no upfront costs, no new hardware or software to buy and you only pay for the applications and IT services you use.
<b>How do I get to my information? Is it secure?</b>	All of your data and applications are centrally stored and backed up in the data center (several options to choose from, based on your needs). You securely access your desktop, apps and data with an encrypted connection from any device, anywhere.
<b>Can I maintain my current IT staff?</b>	IT staff are freed from mundane, low-value tasks such as desktop support, updates and responding to fire drills. Instead, they can focus on strategic initiatives the help fuel business growth. What project have you always wanted to do?
<b>I can already read email from my phone or tablet. How is this different?</b>	What about all the apps and data you use to run your business. DaaS solutions make any device a desktop workspace with full access to all of your apps and data.
<b>We backup our data in case of a disaster. Isn't that enough?</b>	Backup is just one part of the business continuity play. DaaS solutions not only ensure that applications and data remain available, but that your workers can stay productive from any location - using whatever device they have available.

## ABOUT INTRASYSTEMS:

IntraSystems was founded on the premise that a company should focus on their core competencies - not systems and networking infrastructure issues. By assisting in the design, installation, security, and maintenance of networked technologies, IntraSystems enables corporations to focus on business growth and utilize new technologies to enhance corporate productivity. We follow through on all aspects of IT planning, development, and maintenance for server-based computing, security and network integration, network diagnostics, virtual private networks, disaster recovery, and outsourced technical support. Over the years, these services and our long-standing reputation of technological and business integrity have merited an impressive list of satisfied customers. It's an approach that works well in everyday situations — and drives our success!

## KEY FEATURES

1

Simple, self-service IT that gives you freedom and flexibility

2

Pay for only what you use as a predictable monthly expense

3

Ensure your business can weather a disruption and your employees can stay productive
