

**October 2019**

## **Take a Ride on Olli**

*The self-driving shuttle is free and open for the public to ride*

Tuesday, Oct. 1, was the official launch date for two driver-less shuttles which will make regular weekday trips along Technology Parkway.

The autonomous vehicles will travel in specially dedicated outer lanes marked with blue chevrons. While regular traffic will use the two interior lanes. Do not use the outer lanes, these lanes are for autonomous vehicle traffic only.

Please use caution when making right and left hand turns from the interior lanes as you will have to cross over the AV lanes. These shuttle vehicles will be carrying passengers.

The shuttle is free to ride but a signed waiver is required for each passenger. For more information including obtaining a waiver, a daily schedule, shuttle stops and more, please visit the city's dedicated [web page](#).

Technology Parkway is now part of an intelligent mobility test bed and incubator called Curiosity Lab at Peachtree Corners. You may expect other autonomous vehicles to use these lanes as they test their technologies.

For questions, please contact City Hall via email at [info@peachtreecornersga.gov](mailto:info@peachtreecornersga.gov) or by telephone: 678-691-1200.
