It's Time to Fix that Leak!

March 18-24 is Fix-a-Leak Week. Did you know the average American household wastes more than 10,000 gallons of water each year from easy-to-fix household leaks?

Finding and fixing leaks is as easy as "check, twist, replace."

- Check for silent leaks in the toilet with a few drops of food coloring in the tank. Check your sprinkler system for winter damage.
- Twist faucet valves, tighten pipe connections, and secure your hose to the spigot.
- Replace old plumbing fixtures and irrigation controllers that are wasting water with Water Sense labeled models that are independently certified to use less water and perform well.
