City of Peachtree Corners Town Green Upgrade and Expansion Projects – Access Limited Throughout the Winter

Throughout the winter months, certain sections of the Town Green will be closed due to the ongoing expansion. This expansion initiative encompasses various projects aimed at enhancing the Town Green and introducing additional amenities to the area.

To begin, the center of the Town Green will be transformed as crews work on installing drainage upgrades and laying new sod in the park. During this project, the grass area will not be accessible to the public.

Another exciting addition to the Town Green will be the City's new Tot Lot Playground. This playground, themed around space exploration, will be situated nearest the townhomes and is designed for children up to the age of 6.

As part of this project, the current sliding hill and two existing jungle gym features will be replaced. Furthermore, one of the jungle gym features will be relocated to the playground that was installed last year. The upcoming playground will showcase extraordinary elements such as a rocket ship, moon rover, and a crashed UFO, among others. It is

designed to be fully accessible, ensuring that all children can enjoy its offerings. This playground is bound to be a hit with all the kids.

Presently, the construction of the City's off-leash dog park is underway. Situated behind the CineBistro building, this facility will span approximately 9,000 square feet and will be divided into sections for smaller and larger dogs. It will boast both natural and artificial turf areas. Additionally, there will be a plaza featuring a shade sail, water fountains, pet waste containers, shaded benches, and enhanced landscaping.

During the construction phase, access to the park will be limited. However, the existing playground and fitness path can still be accessed through the park entrances located between Taqueria Tsunami and Jinbei West, between Jinbei West and CineBistro, and via the multi-use path behind CineBistro.

We apologize for any inconvenience caused by these access limitations. Nevertheless, we are excited to bring these new features to the Town Green for the enjoyment of our residents and visitors.
