Curiosity Lab Named Winner in IDC Government Insights' Fourth Annual Smart Cities North America Awards

Thanks to your votes, [Curiosity Lab](#) has been named a winner in IDC Government Insights' fourth annual [Smart Cities North America Awards](#) (SCNAA) for the second consecutive year.

We were recognized in the Transportation category for our efforts to support advanced vehicle testing, including our three-mile autonomous vehicle (AV) test track that allows companies to test AV technology in a real-world environment.

Curiosity Lab was one of 13 winners receiving awards in a wide range of categories, including digital equity and accessibility, education, public health and social services, public safety, smart buildings, sustainable infrastructure, transportation infrastructure and more.

"The City of Peachtree Corners, Ga., created Curiosity Lab to serve as a real-world testing environment for next generation intelligent mobility and smart city technology, including connected and autonomous vehicles," said Mayor Mike Mason. "Each year, our city hosts more and more companies on the leading edge of what's possible with smart city innovation, and this award demonstrates Curiosity Lab has been recognized for its continued support to transform smart transportation."
