Sidewalk Project to Begin Connecting Peachtree Corners Circle to Jones Mill Road

This fall, the City of Peachtree Corners will begin construction of a pedestrian sidewalk improvement project on Peachtree Corners Circle and Jones Mill Road.

The 5-foot-wide pedestrian sidewalk will run from the intersection of Peachtree Industrial Blvd. and run north on Peachtree Corners Circle to the intersection of Jones Mill Spur. The facility will continue from that intersection west and then along Jones Mill Road and continue to its termination point.

The construction of this pedestrian facility will allow for a greater ease of use and provide increased safety for those traversing this heavily used corridor and will link residents to the businesses and services in the area. The project will also provide additional connections to existing transit options in the area.

Construction will begin in late November or early December and, weather permitting, will be complete by early Spring 2022.

There are no road closures planned during the construction of this facility.
