Health and Science Journalism Workshop

This one-day workshop is designed to equip aspiring journalists with the necessary skills and knowledge to excel in reporting on health and scientific topics. Through interactive sessions, expert insights, and a practical exercise, participants will learn the art of translating complex scientific concepts into compelling stories

Program Goals

Understand the principles and practices involved in health and science journalism, evidence-based reporting and the critical evaluation of scientific research.

Learn the importance of clear health communications from a reporter, public health officials, science author, research librarian and data analyst

Embrace Innovation and Emerging Trends: will all share information to stay current with best practices

Learn how to communicate complex health and scientific concepts in a clear, accessible, and engaging manner, tailoring their stories to reach diverse audiences across various media platforms.

Enhance Research and Fact-Checking Skills: The workshop will focus on honing participants' research abilities and fact-checking processes to ensure accuracy and credibility in their health and science reports

Program Requirements

- ✓ Must be entering your junior or senior year of high school.
- ✓ Be available at Jamestown Community College October 12 for the school day (in-person attendance preferred, remote accommodations on individual basis)
- ✓ Teams requested to complete a research article under mentorship for possible publication by CHN
- ✓ Journalism, writing, communications or STEM-interested students are encouraged to participate

- Program and lunch are at no cost to participants
- Instructors welcome
- Register by emailing schools@chq.health.
