This guided tour will showcase the school's transformative growth to support its expanding high school community. This is a design-build project, with SWBR as the architect and Hamilton Stern as the design builder. Highlights include:

- A new two-story high school for grades 10-12
- A state-of-the-art Section V gymnasium
- The adaptive reuse of a former church into a three-story ninth grade academy

Together, these facilities create a unified and vibrant campus adjacent to the existing school. Come see how thoughtful design and collaborative delivery are shaping the future of this educational community.

Following the tour, join us for Happy Hour at 5:30 PM at the Genesee Brew House for a drink and hors d'oeuvres!
