www.JEFFCOEATS.org

In 2025, Jeffco Eats faced the abrupt loss of our free donor and volunteer management software, Helping Habit, due to the closure of its company at the end of July. After much research, we decided to contract with Charityproud and began learning and implementing this new system in August of this year.

Charityproud is a cloud-based fundraising and donor management software (CRM) for small to mid-sized nonprofits, offering tools to manage constituents, donations, campaigns, volunteers, events, and communications in one place. Developed by nonprofit and tech experts, it helps organizations streamline operations with features such as online donation acceptance, automated billing, volunteer tracking, grant management, and detailed analytics, all accessible from anywhere to boost donor engagement and efficiency.

Jeffco Eats is excited to use Charityproud to provide a better overall experience for our donors and volunteers, enabling streamlined processing and receipting of donations. In addition, we will have a more robust volunteer management system.

You will also notice that we have begun improving our website (www.jeffcoeats.org) and continue to make monthly updates. Please share your feedback and let us know if there is information you would like us to share on our site. Email: info@jeffcoeats.org
