

Dear Representative,

My company employs [insert number] workers in [insert location] and we're part of the structural steel industry, which employs more than 160,000 American workers throughout the United States. I believe that all taxpayer funded and financed infrastructure projects should be required to use domestically produced material and the work should be done by American workers. I urge you to support legislation requiring the use of American products and American workers.

Thank you for your support of my company and my employees.

Sincerely,

[insert name]
