

SUSTAIN 2025

Join us for EACC's 3rd annual Sustain symposium, where we will review the developments of the last 3 years: what has changed, what has evolved and where are we compared to when we first met in 2023?

Remember when R. A Jones presented their plans to install solar panels at our first Sustain? Now you can sit in that building with those panels installed. Learn about how to track CO2 emissions during the manufacturing process, and explore large-scale industrial recycling efforts. Hear the story of a family business that has locked in its energy costs for 30 years, and get an update on the status of the PJM Power Network - including trends in energy demand, cost and capacity.

And exchange knowledge with your peers of the Greater Cincinnati area, make new connections, explore what the EACC has to offer: Connect you with business leaders.

Keynote

Today's high-velocity business environment demands rapid decision-making, and either/or choices are often the simplest and easiest path forward. But that speed can come at a cost - sacrificing innovation, collaboration and long-term value. The Power of & is a strategic framework that equips leaders to go deep, and slow down just enough to think expansively, unlock breakthrough solutions and drive sustainable growth.

Matt Elliott

Guest Speakers

Daniel Yoder
COO, R.A Jones

Marvin Cunningham

Keynote Speaker

Matt Elliott

Matt Elliott is a nationally recognized sustainability, banking, and finance executive, known for driving transformative growth and championing corporate sustainability. As a sought-after keynote speaker and moderator, Matt delivers strategic insight, authentic leadership, and a passion for advancing a more sustainable and prosperous future. Over a 35-year career, Matt held key executive roles at Bank of America, including President of Bank of America Michigan and Sustainability Executive for Business and Global Commercial Banking. In these positions, he spearheaded the engagement of over 25,000 middle-market businesses on the business case for sustainability, while in Michigan he strengthened employee engagement, cross-business collaboration, and BofA's public reputation.
