GIRLS IN S.T.E.M.

High School & College Students

Free Summer Programs

Emerging Leaders Mentorship Program (High School & College)
Fast-paced, hybrid program, hands-on laboratory experiences in an all-female environment. Meet female luminaries from all across the spectrum of STEM careers.

Girls Who Code offers two summer programs (High School only)**Summer Immersion Program:** a 2-week introductory computer science course includes Game Design and more while gaining exposure to tech industry company partners.

The Self-Paced Program is a 6-week flexible computer science course includes JavaScript for web development, Python and more. Students in Girls Who Code will also have the opportunity to build community through live advisory events and other Girls Who Code engagements.
