This program has been specifically designed to help make the tech industry more accessible to women, with the long-term goal of breaking down barriers that women typically face in entering the male-dominated tech industry.

In order to promote the inclusion of women in tech this course will be offered for **female-identifying learners only**. Advance your tech career with hands-on experience building dynamic and responsive web-based projects. You'll understand front-end and back-end web development learning the software development lifecycle, frameworks, databases, Java, HTML, CSS, JavaScript, algorithms and more.

After 18 weeks, you'll be equipped with the experience to fulfill a wide variety of entry-level positions such as:

- Junior Web Developer
- Web Designer
- App Developer
