

Pullman Solar

Pullman Solar is a 20-megawatt (MW) solar energy project that is proposed for Lee Township, Allegan County. The project will utilize approximately 200 acres. This low-cost, low-impact, environmentally sensitive form of energy is building a cleaner future and creating economic benefits for Michigan and the local community. Pullman Solar will help advance Consumers Energy's goal to meet its customers' needs with 90 percent clean energy resources by 2040.

Pullman Solar Overview:

- Location: Lee Township, Allegan County, Michigan
- Installation Type: Single-axis tracker solar project (photovoltaic array)
- Planned Capacity: 20 MWac
- Construction Start: Q2 2021
- Target Commercial Operation Date (COD): Q2 2022
- PPA Offtake: Consumers Energy

Pullman Solar

Project benefits

The Pullman Solar project provides a unique opportunity for a low impact, high value economic development.

- Total investment in the Pullman Solar Project is estimated to be \$30 million
- 150-200 jobs during peak construction
- 4 full-time employees to operate and maintain the project
- Generation of 38,000 MWh/year, equivalent to approximately 3,240 homes' energy use for one year
- An estimated \$5.5 million in tax revenue to Lee Township and Allegan County over the life of the project

About AES

The AES Corporation (NYSE: AES) is a Fortune 500 global power company accelerating the future of energy. Together with our many stakeholders, we're improving lives by delivering the greener, smarter energy solutions the world needs. Our diverse workforce is committed to continuous innovation and operational excellence, while partnering with our customers on their strategic energy transitions and continuing to meet their energy needs today.
