Your Partner in Memory Care & Assisted Living™

Alzheimer's Disease 2021 and Healthy Brain Aging

Presented by Brent P. Forester, MD, MSc, Chief of the Center of Excellence in Geriatric Psychiatry at McLean Hospital and Medical Director, Behavioral Health Integration, Quality and Patient Experience at Mass General Brigham

Can you prevent getting dementia? Are there any treatments for Alzheimer's? What's the newest research on what causes dementia? With scientists and clinicians making constant advances in the field of brain disease, it can be overwhelming just trying to keep up with all the information, much less trying to understand it.

In a clear and candid way, Dr. Forester, in partnership with Artis Senior Living, will share the very latest news on the science of Alzheimer's.
