Windjammer Cruises Oahu, Hawaii	Captain	October 1991 to May 1993 Winters
Ocean Marine Services Seattle, Washington	Captain / Mate	December 1993 to March 1996
General Steamship Company Dutch Harbor Alaska	Captain	March 1996 to May 1998

Michael Terminel is a seasoned captain with over 40 years of ocean going experience. Captain Terminel is a United States Coast Guard Captain of any gross tons and an Unlimited Master of Towing vessels of any gross tons. Captain Terminel has several endorsement to include, rescue craft, medical care person in charge, tankerman and lifeboatman. He has sailed globally on a multitude of ships.

Captain Terminel experience as a Lead Surveyor, Master of ships, Shore Side Management and a Lloyd's of London Claims Agency, has gained the ability to source the best equipment and repairs for the most cost effective means, keeping projects on time, conducted in a safe manner for the ship owner and clients.

Captain Terminel has four decades of experience working with Port State authorities, USCG, ABS and several other classification societies. His experience meeting regulatory agency requirements in the most cost effective manner has been demonstrated.

## Summary

During his career of over 30 years he has had the enlightened experience to serve his community. Sitting on several Boards of Directors of non-profit organizations to include the American Red Cross, Boys & Girls Club, Arctic Economic Council, Alaska Resource Development Council and the Alaska Vocational Technical Centers Maritime Board. He has been instrumental in raising millions of dollars for those who are less fortunate, workforce development and progressing maritime education.

His family owns and operates Alaska Survey Associates L.L.C. ASA is a full service Maritime Marine Survey business specializing in Condition and Value, Pre-Purchase, Pre-Departure surveys Damage Surveys, Draft Surveys, Cargo and Freight Surveys, Fraud Investigation, Expert Witness Testimony, NDT testing expert, Ultra Sonic Testing Expert, Project Management, Crewing and vessel consultations. Captain Terminel is also an AMSEA instructor teaching stability and mandatory crew training for Alaska Mariners. Homeport is Alaska; however, they will travel to any location globally. In addition he is an approved USCG inspector determining safety, compliance, suitability and stability compliance on United States Commercial Fishing Vessel.

As a dual licensed USCG and Vanuatu Master of any Gross Tons sailing on various vessels transiting Internationally, he has gained the experience to work with countless countries and maritime authorities. He is a USCG approved Evaluator and Designated Examiner for license evaluation of mariners up to an Unlimited Master and Towing Master of any gross tons. During the last 25 years he has worked extensively with an in-depth knowledge of Sub Sea Construction on DP 3 construction vessels with the following projects completed. Flowline Hydrate Remediation, Acid Stimulation of Wells, Flowline Segment Hydrate Remediation., FS2 Fluid Loss, Isolation Barrier Valve replacement, Jumper, EFL's and SFL's lead deployments on the Island Venture a 540' SSCS and Island Venture a 450' SSCS from 2012 to 2021. In his early years, he devoted his time in the cruise vessel industry, most notable the Windjammer Fleet.

With thirty plus expeditions to Antarctica he served as Master, Ice Navigator and Chief Mate on two independently operating ABS Classed vessels for the National Science Foundation, making, supply and humanitarian expeditions to Antarctica. All aspects of the voyage he had complete responsibility from voyage planning, ice mitigation, scientific related marine consultation and the responsibility between 50 and 70 scientific personnel on board. Including maintenance schedules, shipyard periods and managing contracting and approving repair facilities. He has served as project manager with vast experience in multiple shipyards with construction and repair of scientific research vessels in North and South America including the development, and engineering phase to completion of two ABS Classed Ice Breakers. He has served as Master of various ships around the world from the Arctic Circle to the Antarctic Circle in the last thirty years. Entrusted with up to 40 licensed crew members and 200 passengers on International voyages required him to lead in a managing role in all departments to include, Sub Sea Construction, IMR, Navigation, Housekeeping, Bridge Officers, Deck Officers. Purchasing, Engineering and tank ship operations. While maintaining strict compliance with safety and international regulatory requirements, this experienced opened the door to work with the international working group on the Maritime Board with the Arctic Economic Council.

Working with a team of professional he played a crucial dual role in a high stake's Alaskan OCS oil and gas drilling operations. As operation manager for a global shipping company he played a vital role to open prospects to allow responsible drilling in the Alaska OCS. He played a dual role once opening the pathway to drilling in the OCS, he navigated both the Beaufort and Chukchi Seas on the A1 and A3 Ice Classed vessels as Master and Ice Pilot. Both vessels were specialty-built vessel for oil and gas offshore operations in Alaska. In addition, these vessels were specifically designed for Arctic deployment for Oil Spill Response mitigation in ice-covered waters. On shore he helped through a partnership with the State of Alaska Department of Labor and implemented a registered apprentice program where Alaska residents received training for Able Bodied Seaman credentials at AVTEC in 2012 and eventually being employed. During this time his commitment in various fields led to working with the State of Alaska Department of Environmental Conservation and the development of an Oil Spill Response Contingency plan for company vessels operating in Alaska State waters. Utilizing newly developed technologies for oil spill response in ice-covered waters. With new technologies in the field, it took special modifications and the specialization of these vessels. One of these vessels was the first vessel over 500 gross tons inspected by the USCG as an OSRV.

He has operated on multiple MSC ships at Captain and Chief Officer contracted to the Department of Defense holding Top Secret Security Clearances. Ships were engaged in AUV Sub Sea operations.

He has had the tremendous opportunity to work for a major global shipping company from 1998 to present. Developing and working with special interest groups. State and Federal agencies to develop an Arctic Policy. He was positioned in Alaska to develop a strong working relationship with the political leaders and industry. In the last ten years he has succeeded in Business Development and have delivered a strong voice to the State of Alaska as a strong corporate partner and an advocate to the community leading to a Board Position on the Resource Development Council supporting Alaska's companies, workers and families.

He was past President of AVTEC, State of Alaska Vocational Technical Education Center Maritime Advisory Board from 2012 to 2020. We have developed curriculum for the anticipated IMO Simulator Ice Navigation class and are developing plans for a Simulator Based Engineering Class. He is a USCG approved instructor in Ice Navigation and ECDIS. As Board Chair he helped negotiate a 5-million- dollar donation to the Maritime Department in Q1 2016.

Captain Terminel has made 46 ocean crossing to include the following regions of operations of Chile, Mexico, Australia, New Zealand, Argentina, Brazil, Panama Canal, Barbados, Nigeria, Angola, United Kingdom, Scotland, Bahamas, St Lucia, St Thomas, Amazonia, Ecuador, Trinidad, Alaska, Canadian Arctic, Jamaica, Alaska, Florida, Bahamas, Bermuda, Mississippi, Alabama, Louisiana, Texas, Washington, California, Hawaiian Islands, Guam, Philippines, Singapore, South China Sea, North and South Pacific Ocean, North and South Atlantic Ocean, Bering Sea, Chukchi Sea, Caribbean Sea, North Sea, Baltic Sea, Straits of Magellan, and the continent of Antarctica to include, Ross Sea & Ice Shelf, McMurdo, Palmer Station, Weddell Sea, Larsen Ice Shelf, Western Antarctica.
