DATE: Thursday, 8/6/20

PROJECT TYPE: Roadway

As part of Governor Scott's "Work Smart, Stay Safe" order, all construction crews are currently subject to certain safety restrictions.

Planned Construction Activities, week of 8/10:

Paving of the main roadway (mainline) along Green St. has been completed.

Paving on Route 22A south of the bridge and the southern portion of the project area between the bridge and the Panton town line will continue all day today. **Please expect delays.** The goal is to have all mainline paving south of the bridge completed by the end of the day today.

On Friday, 8/7 paving will begin between 2:00 and 3:00 AM on the north side of the bridge on Route 22A and will progress north along 22A for the entire day. Paving crews will be out of the downtown/night work limit area by 8:00 AM per the contract specifications. Paving will continue along Route 22A in the daytime work areas until mid-late afternoon. Paving along the northbound lane areas will take two full days.

On Saturday, 8/8 paving will begin north of the bridge at approximately 2:00-3:00 AM, and progress along Route 22A in order to finish all of the paving along 22A on the north side of the project. Paving operations will be out of the night work area by 8:00 AM on Saturday morning. Paving will continue on Saturday until late afternoon.
Delays will occur during paving operations and the public is urged to add extra time to their travel plans.

Planned construction activities, week of 8/10:

Permanent line striping layout and painting is being scheduled.

Paving of side road aprons is currently scheduled for Monday and Tuesday next week.

Paving of driveway aprons is being scheduled and may begin next week.

Crews will begin placing shoulder material and topsoil where needed, and will begin some clean-up operations along the project limits.

Weather and surface conditions can delay or alter the paving and line striping schedule.

Traffic Impacts:

Please expect alternating one-way traffic in the vicinity of paving operations. Traffic control personnel will be onsite helping to direct the flow of traffic. ***Moderate delays are expected to occur during peak travel periods along Route 22A. Motorists are urged to add extra time to their travel plans next week if traveling through the project area.***
