Dairy Outlook

*Excerpts from Livestock, Dairy, and Poultry Outlook,
April 17, 2024, USDA, Economic, Research Service*

Dairy Forecasts for 2024:

The 2024 dairy herd size forecast is 9,355 thousand head, unchanged from the previous month. Anticipated lower yield per cow throughout the year has led to a reduction of 100 pounds per head, now forecast at 24,245 pounds. Consequently, the revised milk production forecast for 2024 is 226.3 billion pounds, a decrease of 1.0 billion from the previous month's estimate.

Dairy imports were adjusted upward from last month's forecast. On a milk-fat basis, dairy import projections in 2024 were raised to 8.0 billion pounds (+0.3 billion), while on a skim solids basis imports were raised to 6.8 billion pounds (+0.1 billion). Higher import volumes of products such as cheese, butter, infant formula, yogurt, dry whey products, and canned milk are anticipated for 2024.

The 2024 dairy export forecast on a milk-fat basis has been raised 0.2 billion pounds to 11.3 billion based on expected strong international demand. The export forecast on a skim-solids basis is lowered to 49.7 billion pounds (-0.3 billion). In 2024, export shipments of skim milk powder, cheese, and butter are expected to increase, while those of dry whey products and lactose are anticipated to decrease.

The 2024 forecast for domestic disappearance has been lowered from last month's projection. On a milk-fat basis, domestic use decreased by 1.7 billion pounds, bringing the total to 223.0 billion pounds. On a skim-solids basis, the domestic use forecast declined by 0.5 billion pounds, totaling 182.9 billion pounds.

Based on recent mixed price trends, the adjusted forecasts, in dollars per pound for dairy products, are as follows: Cheddar cheese \$1.620 (-9.0 cents), dry whey \$0.425 (-2.50 cents), butter \$2.925 (+12.5 cents), and NDM \$1.180 (-3.0 cents).

With lower cheese and dry whey prices, the new forecast for Class III milk is \$16.20 per cwt, \$0.95 lower than the previous forecast. With higher butter price projections more than offsetting lower NDM prices, the Class IV price forecast has been raised to \$20.40 per cwt, \$0.30 higher than the previous projection. The all-milk price for 2024 is now forecast at \$20.90 per cwt, down \$0.35 from last month's forecast.

WASDE Dairy Report ^{1/} WASDE – 647-5, April 11, 2024

The milk production forecast for 2024 is lowered on slower expected growth in milk per cow; cow numbers are unchanged from last month. Fat basis imports for 2024 are raised on higher expected butter and cheese imports. Skim-solids basis imports are raised for a number of dairy products. Fat basis exports are raised on strong international demand for butter and price competitiveness of U.S. cheese. Skim-solids basis exports are lowered as fewer expected shipments of lactose and whey products more than offset higher shipments of nonfat dry milk (NDM) and cheese. Butter prices for 2024 are raised on observed prices and continued strength in demand. Cheese, NDM, and whey prices are all lowered on recent prices. Class III prices are lowered due to lower cheese and whey price forecasts. Class IV prices are raised due to higher butter prices more than offsetting lower NDM prices. The all-milk price for 2024 is projected to be lower at \$20.90 per cwt.
