

Boyne Valley Garden Club Spring Shrub and Perennial Sale

We are selling plants that are good sources of nectar and seeds for feeding birds and butterflies.

The plants are hardy to at least -30° to survive our cold winters.

- **Fire Light Hydrangea** (Hydrangea paniculata) is easy to grow and blooms reliably. It has huge 12 to 16 inch blooms that emerge white in mid-summer and soon age to a vivid red. It has sturdy, strong stems and likes full to part sun and average water needs. It won't grow well in soggy soil. **1 gal. pot, \$26.00 each or 3 for \$75.00.**
- **Twilight Zone Grass** is a selection of native Little Bluestem grass. It is green in the spring; silver, blue and mauve in the summer and it has bright purple highlights in the fall. Winter color is tawny gold. It is 2 ft. tall, full and upright. The seed stalks are 4 to 4 ½ ft. tall with silvery white seeds. It likes full sun, dry to average soil and needs cutting down in early spring. **1 qt. pot, \$14.00 each or 3 for \$39.00.**
- **Million Dollar Blue Delphinium** has large spikes of semi-double to double, true blue flowers in the spring and again in late summer or early fall. It is 2 ½ to 3 ft. tall and 18 to 24 in. wide with very erect, sturdy stems. It likes full sun or part shade and the soil shouldn't dry out. **1 qt. pot, \$14.00 each or 3 for \$39.00.**
- **Berry Chiffon Coreopsis** is a native cultivar. It has white flowers with a vibrant raspberry red eye and it blooms midsummer through early fall on slender stems. The raspberry color spreads over most of the flower in cooler weather. It is 15 to 18 in tall and wide, needs full sun and low to average water. **1 qt. pot, \$13.00 each or 3 for \$36.00**
- **Lime Rickey Coral Bells** (Heuchera) has ruffled leaves that emerge brilliant chartreuse in the spring and mature to lime green in the summer. It is 8 in. tall and 18 in. wide with small white 16 to 18 in. tall flowers in May and June.
