

Open Forum at Boyne City High School

Tuesday, Nov. 27, 2018 ▪ 7 p.m.

In recent months, the trend of teen vaping has become a growing concern for school leaders around Northwest Michigan. Vaping contains many harmful chemicals, including nicotine. Vaping devices continue to change as well, making it challenging for parents, caregivers and school administrators to stay on top of current trends. Please join us for a presentation by area experts and receive important resources to take home. *Other issues to be discussed include opioid use, social media and emotional health and awareness.*

Tuesday, Nov. 27, 2018 ▪ 7-8 p.m.

Boyne City High School Auditorium ▪ Parents & Community Welcome

PRESENTERS

- **COREY HEBNER**, Michigan State Police
- **SUSAN PULASKI**, Community Health Coordinator, Health Department of Northwest Michigan
