

# ONLINE AUTISM RESEARCH OPPORTUNITY

## Purpose of the study

The purpose of this research study is to better understand the different cultural, contextual, parental, and child variables that influence parenting stress in caregivers of autistic children and youth. This information may help us design better screening, assessment, and intervention tools for autism. Participants also have the opportunity to win a monetary gift card. Upon completion of the study, two participants will be selected to win a \$25 gift card.

- Open the camera app on your phone
- Point the camera at the QR code
- Click on the link that appears to take the survey
- Or visit this link
