

Messages

The SALT messages we need to deliver are:

1. **We stand firmly for the preservation of the full deduction for state and local taxes**, and urge you speak out in favor of SALT and vote against any tax reform plan that eliminates, restricts or modifies this deduction.
2. **SALT has been a fixture of the federal tax code and our nation's fiscal federalism for more than 100 years** to guard against double taxation of households and protect the fiscal integrity of state and local governments, and it should remain in the tax code without limitation.
3. **Any limitations, restrictions or changes to SALT would undermine these fundamental principles of our federalism and create a slippery slope** that would subject SALT to continued erosion whenever Washington needs more money — at the expense of 44 million middle class households and homeowners who now claim this deduction.
4. **The elimination of SALT is one of the largest sources of revenue in the "Big Six" tax plan, estimated at \$1.3 trillion dollars taken from 44 million households**. Thus, any compromise and anything less than preserving the full deduction is sure to cause millions of taxpayers to pay higher taxes, undermine funding for state and local government and the services they support and possibly cause home values to decline as well.

Targets

Calls to any members of Congress are helpful, but we ask you to do everything possible to make sure the members in the below table hear from you because all of them have high SALT percentages in their districts and have the most to lose if SALT is changed. If you have state or local affiliates that touch these districts, please share with your colleagues and ask them to take action today. Please don't be shy; more calls are better than fewer. We can't overdo it. We need to mobilize.

The phone number for the Congressional switchboard is (202) 224-3121. Please let us know what you hear. Thanks so much.

California

Nunes (R)
