## Knox County

Our Economic Development Director conducts a Leadership class each year and is comprised of people from all Knox County communities. The 2018 Leadership group with Knox County Economic Development Director Megan Hanefeldt Seated, front right, took a tour of the Courthouse today and met with all of the officials to learn what each office is responsible for.

Leadership Knox County is a personal enrichment course, focusing on three key areas: leadership skill building, networking and increasing community knowledge. The goal of Leadership Knox County is to identify potential leaders in each community across Knox County and help them to engage in leadership positions. Exposing the class to local county government is just one way we work to increase their community knowledge!
