

Dr. Nadia Saklou is a PhD student at Virginia-Maryland College of Veterinary Medicine (VMCVM). She is studying diagnostic sequencing of Equine Herpesvirus type-1 for her dissertation. Dr. Saklou completed her veterinary doctorate at Colorado State University and a residency in Large Animal Internal Medicine at VMCVM. Throughout her academic years she has performed research encompassing many facets of infectious disease including biosecurity, wildlife-livestock interface, and most recently diagnostics. Her combined training is leading her to become a clinician scientist with a focus on infectious disease management.
