

Robert Polon works at the California Animal Health and Food Safety (CAHFS) Laboratory in Davis, California as a student assistant in the electron microscopy lab, where I have been blessed to have the resources, guidance, and support to carry out my project. Currently, I am an undergraduate student at UC Davis pursuing a major in biological sciences and a minor in animal science. Though I am a candidate for medical school, I am honored to be a part of this conference and the greater diagnostic veterinary medical community.
