

Model C6000

Advanced Construction Calculator with Protective

When working on construction projects, the ability to use and convert between dimensions like feet, inches, and pounds is a critical feature. The Victor C6000 allows you to do just that. The Advanced Construction Calculator features the ability to solve a variety of construction related equations, calculate material estimates and costs, and display results in fractional or decimal forms. Includes a protective case, pocket reference guide, and full instructional manual with examples available as a PDF online, paired with a series of instructional videos.

Displays in Fractions or Decimals

Works With Units of Measurement

- US Dimensional Units
- Metric Dimensional Units
- Convert Between Dimensions

Area, Volume, and Perimeter Functions
