

# Kaiser Permanente Los Angeles

## GME Virtual Open House

The 560-bed Los Angeles Medical Center (LAMC) serves as the tertiary care facility for nearly 4.5 million Kaiser Permanente (KP) members throughout Southern California. Led by our Graduate Medical Education (GME) department, we provide training to over 200 residents and fellows in 20 ACGME-accredited programs with a focus on person-centered, high-quality care.

### We will be hosting three virtual open houses

- Each event is open to all interested medical students, residents, and practicing physicians
- Learn about the values and key priorities of our organization and the unique medical center and GME offerings at LAMC
- Participate in breakout sessions with representatives from all 20 training programs
- Hear from current residents and fellows as to why Los Angeles is a great city to call "home"
