

Advanced Placement Courses

CRIMSON GLOBAL ACADEMY

College-level courses, for ambitious high school students

Improve your admissions profile, challenge yourself, and earn college credit with our Advanced Placement (AP) courses.

Small, part-time, intensive weekend courses

Our classes take place on the weekends and are limited to no more than 10 students. They're designed for driven students that wish to study extra subjects in addition to their regular high school workload.

Classes take place in three-hour sessions (with breaks), once per week. Students will target the May 2021 exam session.

**Classes begin on
Saturday, 7th
November.**

Subjects offered

These subjects are the ones most requested by the Crimson Community — they're also the most suited to intensive learning and provide the foundation to more advanced courses in the future.

AP Psychology

Explore the ideas, theories, and methods of the scientific study of behavior and mental processes.

AP Computer Science Principles

Gain an introduction to the creative aspects of programming, abstractions, algorithms, large data sets, the Internet, cybersecurity, and how computing impacts our world.

AP Computer Science A

Get familiar with the concepts and tools of computer science as you learn a subset of the Java programming language. You'll do hands-on work to design, write, and test computer programs.

AP Statistics

Learn about the major concepts and tools used for collecting, analyzing, and drawing conclusions from data.

Live instruction from AP teachers, not tutors

Learn from experienced teachers with a proven record of success in the APs. Our group-classes are conducted live in small, seminar-style online classrooms and are optimized for participation.

Advanced Placement Courses

Why take an AP course?

- **Boost your candidacy for college applications:**
Earning top scores in an AP course is the best way to demonstrate your academic ability to colleges.
- **Give yourself an edge in college:**
APs allow students to earn college credit and pursue more advanced courses.
- **Take a deep-dive into areas of passion:**
Explore areas of interest, such as Psychology or Computer Science, and provide a clear indication of your academic passions.
- **Gain a head start in high school:**
Study college-level material, early.
- **Maximize the return on your time:**
Our AP courses are designed to be fast-paced at convenient weekend times, perfect for students looking to go the extra mile.
- **Challenge yourself:**
AP classes are rigorous and demanding, offering an intellectual stimulation that you won't get elsewhere.
