# INTERDISCIPLINARY STEM SEMINAR SERIES

## (Science Technology Engineering Mathematics)

## Women in Chemistry: Past, Present and Future

Monday, September 18<sup>th</sup>, Reuter Center, Room 102A  
4:30 PM to 6:00 PM

### *Speakers:*

**Dr. Sally A Wasileski**, Associate Professor

**Dr. Oksana Love**, Lecturer

Department of Chemistry, University of North Carolina Asheville

Women have long been an underrepresented group in science, technology, engineering and mathematics (STEM) fields and chemistry is no exception. This presentation will highlight the scientific achievements and barriers to success for women chemists, the current status of gender parity in chemistry, and how we can make an impact in supporting women pursuing careers in chemistry.
